

# Abstract Open Framework (AOF\*)

Predictive AI driven Intelligence in action

Eliminate 98% of manual work. Accelerate your enterprise automation with AOF\* document extraction, interpretation and straight-through processing platform.

90% accuracy in 30 days\*

Guaranteed

*No Templates. No Regex Rules. Easy Setup. Self Learning Models. Predictive AI*

## 80% of all enterprise data is unstructured

AOF\* unlocks value from unstructured documents like texts, images, pdfs, emails, and much more, delivering measurable impact across your enterprise.

20%  
Structured  
Data

80%  
Unstructured  
Data

### Automate

Template-free Data Extraction

Upload Invoices, Purchase Orders, Contracts, Legal Documents and more. Extract Data. Catalog/ Sort.

### Analyze

Predictive AI with self-learning capabilities

Analyze unstructured data, extract actionable business insights and ML intelligence with high accuracy.

### Act

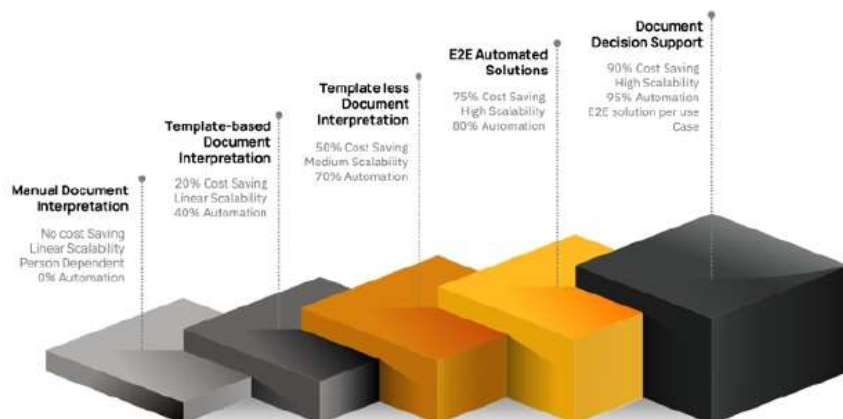

Integrate with SAP, Quickbooks, RPA & more

Transform manual, inefficient processes into powerful solutions to solve complex business processes & challenges

Why AOF\*?

## Abstract Open Framework (AOF\*) - Predictive AI Document Processing (PADP)

AOF\* - PADP Maturity Model enables Predictive Data Extraction WITHOUT creating templates for each document layout. Automate end-to-end processes and run decision analytics directly on top of the documents.

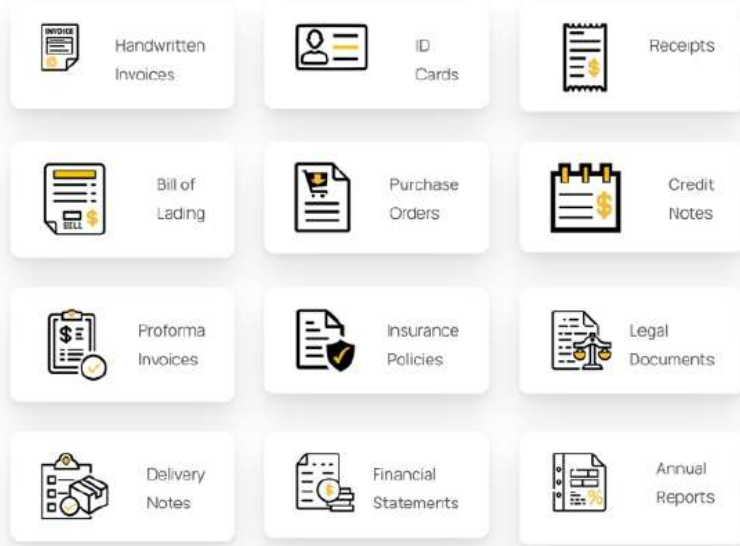

# Extract Data from ANY unstructured or structured documents

Extract data from any documents of varying formats like receipts, invoices, financial tables, graphs, purchase orders, handwritten, legal documents and more with 'human level accuracy'.

Automate your manual document processing and cut down costs up to 70% with more than 200% increase in productivity levels.

Ask Sales Representative for more information on all document types

## Use Cases

# Predictive AI driven Document Processing. **The New Normal for Business agility**

AOF\* Predictive Document Processing framework uses machine learning, computer vision, predictive analytics, and NLP to automate manual data processing that facilitates straight-through-processing and hyper automation within enterprises.

## As we automate the PROCESS, you automate the PROFITS!

Use Abstract Open Framework (AOF\*) to automate extraction of documents like invoices, free-form expense reports, handwritten documents, so that your business processes like payables, receivables, etc. are processed at lightning speeds, with fewer exceptions and lower cost.

AOF\* offers template-less, automated document processing, and thus removes the drudgery of manual entry from unstructured documents. Say NO to templates and Regex rules! and is platform agnostic.

### Cognitive Capabilities

It sees the documents in the same way, a human mind reads.

### Adaptive learning

The more documents it processes the more intelligent it gets.

### Instant Setup

No pre-requisites needed. Quick Access through common web browsers.

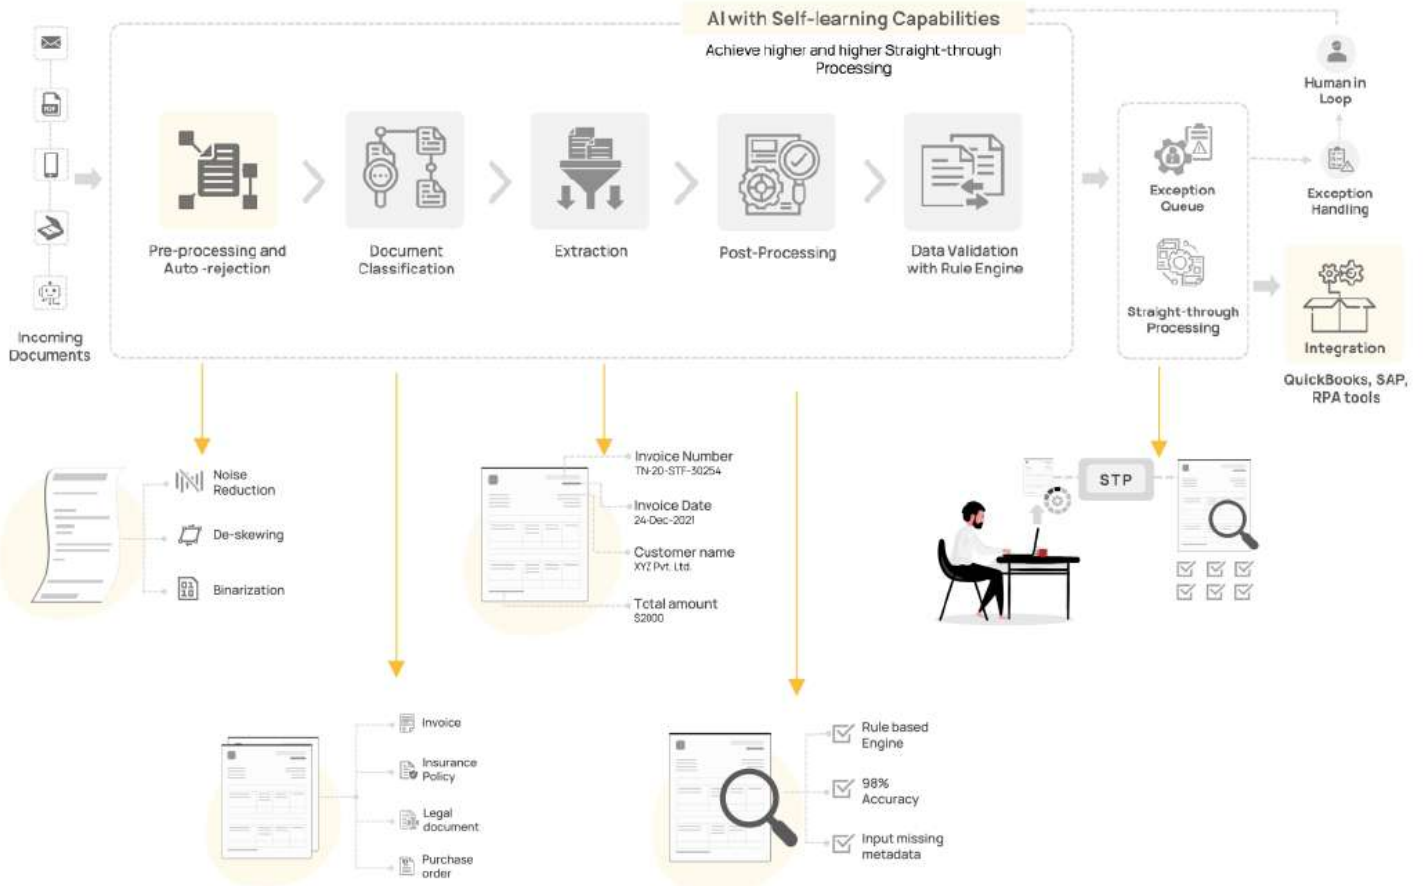

### Got Anything else in mind? we have options

Automated document processing software can also be customised per your requirement.

# Unlock your competitive edge hidden within structured & unstructured data with AOF\* PADP

Classify, categorize, extract relevant information and validate extracted data. Exponentially improve accuracy and Straight-Through-Processing (STP) with PADP self-learning intelligent framework.

## Implementation Life Cycle

Say good bye to manual data entry and document processing. Automate document extraction, interpretation and processing using AOF\* PADP.
